NEWS FOR IMMEDIATE RELEASE

2020 PROVES SUCCESSFUL FOR NASA SEWP

Greenbelt, MD, October 7, 2020 – NASA Solutions for Enterprise-Wide Procurement (SEWP) completed the 2020 Fiscal Year with total funding of new orders and of modifications to previous orders of more than \$9 billion, an almost 40% increase over FY19. In FY20, SEWP processed more than 46,000 new orders from 90 cabinet-level and independent agencies, commissions, boards and other Federal entities from over 1,300 sites around the world.

As a result of the continued increase in federal adoption, the NASA SEWP Program Management Office (PMO) has announced the reduction of the SEWP V GWAC usage fee from 0.36% to 0.34%. Lowering the usage fee is a way for the program to continually pass along the savings associated with using NASA SEWP to agencies, companies, and the US taxpayer.

Additionally, the SEWP PMO had several major achievements and launched key initiatives over the past year, including:

- *Launching Customer Odyssey Team* – focusing on the needs of customers and an enhanced SEWP experience;
- *Introducing Customer liaison positions* – providing customized agency-specific support to major users;
- *Launching an Online CIO portal* – sharing accurate data with Agency CIOs for improved understanding, visibility, and insight;
- *Launching an Online Provider portal* – providing system visibility for the industry vendor community;
- *Immediately switching to 100% tele-work staff* with no impact to Government and Industry customers;
- *Exercising the 5 year option* for over 200 NASA SEWP Contracts;
- *Successfully responding to, and executing on, the 889 contract requirements.*

“NASA SEWP has enjoyed steady year-over-year adoption under the current vehicle since its inception in 2015, but FY 2020 exceeded all expectations,” Program Director Joanne Woytek said. “The year was challenging for many in government, including ourselves, but we are proud of our team’s performance at servicing the needs of federal contracting commands. NASA SEWP looks forward to FY 2021 as we place a renewed focus on internal and external education, training, data quality, and contextual analysis. Through our data and increased awareness into our customers’ needs we will revisit who we are, what we do, and how we do it to reshape our approach at continuous improvement built on a tradition of innovation.”

“The mantra ‘Often happy, never satisfied’ is at the core of what we do,” Woytek added. “We are happy agency buyers like to use our vehicle to meet their acquisition needs, and we have already begun putting the pieces in place to continue setting a high standard in facilitating federal IT acquisitions.”

About SEWP

NASA Solutions for Enterprise-Wide Procurement (SEWP) is a multi-award Government-Wide Acquisition Contract (GWAC) vehicle focused on ICT (Information and Communication Technology) and Audio/Visual products and services. Information is available at www.sewp.nasa.gov. If you would like more information about this topic, please contact SEWP PMO Office at 301-614-1478 or email at help@sewp.nasa.gov.
